In electronics, impedance matching is the practice of designing the input impedance of an electrical load or the output impedance of its corresponding signal source to maximize the power transfer or minimize signal reflection from the load.. In the case of a complex source impedance  $Z_S$  and load impedance  $Z_L$ , maximum power transfer is obtained when  $Z_L = Z_S^*$ — where the asterisk indicates the ...

In radio and telecommunications a dipole antenna or doublet is the simplest and most widely used class of antenna. The dipole is any one of a class of antennas producing a radiation pattern approximating that of an elementary electric dipole with a radiating structure supporting a line current so energized that the current has only one node at each end.

Terminologie. Originea cuvântului antenă, relativ la aparatura de transmisie radio, este atribuită pionierului italian în domeniul radio, Guglielmo Marconi. În 1895, în timp ce testa aparatura radio în Alpii Elvețieni, la Salvan (Elveția), în regiunea Mont Blanc, Marconi a făcut experimente cu antene sub forma unor fire conductoare lungi.

Introduction Heavy oil is defined as liquid petroleum of less than 20°API gravity or more than 200 cp viscosity at reservoir conditions. No explicit differentiation is made between heavy oil and oil sands (tar sands), although the criteria of less than 12°API gravity and greater than 10,000 cp are sometimes used to define oil sands.
