The hypothesis of linguistic relativity holds that the structure of a language affects its speakers' world view or cognition. Also known as the Sapir-Whorf hypothesis, or Whorfianism, the principle is often defined to include two versions: the strong hypothesis and the weak hypothesis: . The strong version says that language determines thought and that linguistic categories limit and ...

General relativity (GR, also known as the general theory of relativity or GTR) is the geometric theory of gravitation published by Albert Einstein in 1915 and the current description of gravitation in modern physics. General relativity generalizes special relativity and Newton's law of universal gravitation, providing a unified description of gravity as a geometric property of space and time ...

Rethinking Relativity by Tom Bethell. No one has paid attention yet, but a well-respected physics journal just published an article whose conclusion, if generally accepted, will undermine the foundations of modern physics--Einstein's theory of relativity in particular.
