CAUTION: Always route coil cables away from the patient, using pads and /or cable covers to eliminate or minimize the chances of contact between the coil cable and the patient. Failure to do so could result in a thermal injury. Within our modules, we will offer suggestions as to appropriate RF coils to be used for various MRI exams.

Assessment of joint functional and proprioceptive abilities is essential for balance, posture, and motor control rehabilitation. Joint functional ability refers to the capacity of movement of the joint. It may be evaluated thereby measuring the joint range of motion (ROM). Proprioception can be defined as the perception of the position and of the movement of various body parts in space.

A conceptual model helps visualize the concepts and processes identified by the participants (). This practice framework can be applied to one massage therapy session or a series of sessions and is intended to be flexible and adaptive. This model builds upon the previously mentioned four-phase model (Andrade, 2014, Baskwill, 2011), with additional elements added to the process.
