Why this poster’s message is important. The text in this promotional piece for careers in geography was written to grab your attention. But its simplicity belies a greater potential impact because it is based upon research about how young people, from underrepresented groups especially, make their career path choices.

The MTHFR gene provides instructions for making an enzyme called methylenetetrahydrofolate reductase. This enzyme plays a role in processing amino acids, the building blocks of proteins. Methylenetetrahydrofolate reductase is important for a chemical reaction involving forms of the vitamin folate (also called vitamin B9).
