Locally-installed software. Password managers commonly reside on the user's personal computer or mobile device, such as smart phones, in the form of a locally installed software application. These applications can be offline, wherein the password database is stored independently and locally on the same device as the password manager software.

### **Password manager - Wikipedia**

A password is a word or string of characters used for user authentication to prove identity or access approval to gain access to a resource (example: an access code is a type of password), which is to be kept secret from those not allowed access.. The use of passwords is known to be ancient. Sentries would challenge those wishing to enter an area or approaching it to supply a password or ...
