ABSTRACT. Cissampelos sympodialis Eichl. is a plant species used in popular medicine in Northeast of Brazil, whose pharmacological studies are very promising in the treatment of diseases of the respiratory tract. In this work, a pharmacobotanical study of the leaves was performed with the objective to elaborate a macroscopical and microscopical morphodiagnosis to support its characterization.

Goji, goji berry, or wolfberry, is the fruit of either Lycium barbarum or Lycium chinense, two closely related species of boxthorn in the nightshade family, Solanaceae.. Both species are native to Asia, and have been long used in traditional Asian cuisine. The fruits are similar but can be distinguished by small but significant differences in taste, sugar content, and content of the aminoacid ...

Natural products have been the source of most of the active ingredients of medicines. This is widely accepted to be true when applied to drug discovery in "olden times" before the advent of high-throughput screening and the post-genomic era: more than 80% of drug substances were natural products or inspired by a natural compound .It is, however, arguably still true: comparisons of the ...
