A propeller-shaped highly congested mesityl-substituted tri(9-anthryl)methyl radical was synthesized by developing a method that overcomes the challenges posed by the bulky substituents. In their Communication on page 16516 ff., T. Nishiuchi, T. Kubo, and S. Aibara also report on the high persistency, wide-range absorbance, good reversible redox properties, and dimerization behavior of this ...

In thermodynamics, work performed by a system is the energy transferred by the system to its surroundings, that is fully accounted for solely by macroscopic forces exerted on the system by factors external to it, that is to say, factors in its surroundings. Thermodynamic work is a version of the concept of work in physics.. The external factors may be electromagnetic, gravitational, or ...

Determinism is the philosophical idea that all events, including moral choices, are determined completely by previously existing causes. Determinism is at times understood to preclude free will because it entails that humans cannot act otherwise than they do. It can also be called as hard determinism from this point of view. Hard determinism is a position on the relationship of determinism to ...

Abstract: Today in the conventional power steering systems, it is observed that there are many drawbacks, such as it reduces the engine power in case of hydraulic power steering system, reduces mileage which leads to increased demand of fuels. This increases the operating cost. There is a need to develop such a system which enhances the engine performance and gives better result as of the ...
