Scope. Physical Chemistry Chemical Physics (PCCP) is an international journal for the publication of cutting-edge original work in physical chemistry, chemical physics and biophysical chemistry. To be suitable for publication in PCCP, articles must include significant new innovation and/or insight into physical chemistry; this is the most important criterion that reviewers and the Editors will ...

AP Physics B (discontinued) AP Physics B "discontinued in 2014" was supposed to be equivalent to an introductory algebra-based college course in physics, with a laboratory component. The course was non-calculus-based, utilizing algebra and basic trigonometry to solve various physics problems. AP Physics B was divided into five different sections: Newtonian Mechanics, Fluid Mechanics and ...

Particle physics (also known as high energy physics) is a branch of physics that studies the nature of the particles that constitute matter and radiation. Although the word particle can refer to various types of very small objects (e.g. protons, gas particles, or even household dust), particle physics usually investigates the irreducibly smallest detectable particles and the fundamental ...

"From conservation of energy to the principle of least action: A story line," Jozef Hanc and Edwin F. Taylor, American Journal of Physics, Vol. 72, No. 4, Aril 2004, pages 514-521. Conservation of energy is sufficient to predict motion in one dimension and for systems whose motion can be expressed as one independent coordinate.

This note provides an introduction to the mechanics of solids with applications to science and engineering. Itemphasize the three essential features of all mechanics analyses, namely: (a) the geometry of the motion and/or deformation of the structure, and conditions of geometric fit, (b) the forces on and within structures and assemblages; and (c) the physical aspects of the structural system ...
