Introduction by Graham Davies. A "concordance", according to the Collins Cobuild English Language Dictionary (1987), is "An alphabetical list of the words in a book or a set of books which also says where each word can be found and often how it is used." I first came across the term "concordance" from one of the lecturers who taught me at university during the early 1960s.

How to open an assisted living facility is one of the more common questions we receive. Unfortunately, there is not one 'formula' for opening an assisted living facility, as the laws, procedures and licensure vary from state-to-state, but there are some things that you might want to consider. We offer our insights and inspiration from our administrator interviews, video tours and experience ...

Definition 1: The covariance between two sample random variables x and y is a measure of the linear association between the two variables, and is defined by the formula. Observation: The covariance is similar to the variance, except that the covariance is defined for two variables (x and y above) whereas the variance is defined for only one variable. In fact, $cov(x, x) = var(x)$.
