Multiple choice questions on surveying and levelling pdf

Levelling deals with measurements in a vertical plane. Level surface: A level surface is defined as a curved surface which at each point is perpendicular to the direction of gravity at the point. The surface of a still water is a truly level surface. Any surface parallel to the mean spheroidal surface of the earth is, therefore, a level surface.

What is levelling? - Surveying & Levelling - Articles | News

A. DEFINITION OF SURVEYING In general, surveying is performed to determine the relative location or positioning of points on or near the earth's surface. More specifically, surveying is the science of making measurements, relative to known or assumed datumâ€™s and standards, and applying the principles of mathematics to
