Here's some build info I've put together on the Alembic F-2B. I'm planning to build myself one of these sometime real soon. The original's My redrawn schematic is primarily based on R.G. Keen's, except for the selectable hi cutoff switch SW1 + C2, which was not part of the original design. But, I saw it in someone else's F-2B project and decided to include it.

The Fender Twin is a guitar amplifier made by Fender Musical Instruments Corporation. It was introduced in 1952, two years before Fender began selling Stratocaster electric guitars. The amps are known for their characteristically clean tone. The Twin has seen a number of revisions since its introduction, both internal and external, with its designs sometimes varying greatly from one year to the ...

In NYC in the mid-seventies, an electronic-based band arose amongst all the guitar punks, a band that was known as much for their confrontational post-beatnik vocals as for the strange and intense sounds that emanated from their famously homemade electronic sound equipment.

Q: Who are your favorite guitarists? A: Michael Schenker is my all-time favorite guitarist, especially on his albums with UFO. The first album I ever bought as a teenage kid was UFO's "Force It", mainly because of the picture on the back cover showing Michael Schenker with a Gibson Flying V and a bunch of Marshall stacks.

In 1906, American engineer Lee de Forest invented the first amplifying vacuum tube, the Audion whose amplification of weak audio signals contributed to advances in sound recording, radio and film, and the invention of early electronic musical instruments including the theremin, the ondes martenot, and the trautonium. Most of these early instruments used heterodyne circuits to produce audio ...
